

To whom this my concern,

On the *(date)* I will be boarding flight *(flight number)* to *(destination)*. I would like to confirm that boarding with my electric unicycle will be permitted on this flight.

The electric unicycle contains a 132 Wh lithium iron battery that can be removed and carried separately.

The battery is a self enclosed 132Wh Lithium ion battery with a removable fuse and closed terminals with full UN 383. and IATA Certification for Safe Air and Road Transport documentation.

The electric unicycle does NOT consist of a battery. It weighs 9.8kg, the size of a briefcase, and is called Uniwheel.

Please can you confirm that I will be allowed to travel with a device.

Regards
